Sales Summarizer — Delivery Pack

Product: Sales Summarizer **Tier / price:** $300 **Store page:** https://bleuquest.gumroad.com/l/erhgfp **Delivered:** 2026-10-06 (instant download — delivery pack v1.0)

---

1. What you purchased

Your sales numbers, distilled. This AI agent watches your sales activity and delivers plain-language summaries — what moved, what stalled, what needs a follow-up today.

WHAT YOU GET: • Working sales summarization agent — daily digests, weekly rollups, or on-demand **• Connectors** — CRM exports, spreadsheets, email, or your pipeline tool **• Custom scoring** — define what "hot" means for your business **• Deployment on your infrastructure** — your data stays yours **• Source code** — you own it, modify it freely **• 30-day support** — we fix anything that doesn't work for you

Delivery: 3-7 business days. Built on SoulTech AI by Kiwann Williams.

This is a service engagement, not a software license. Scope per agreed SOW; deliverables are licensed, not sold. Your data stays your property. Third-party platform compliance (e.g., WhatsApp Business API, Discord ToS) is the client's responsibility. Cancel before work begins for a full refund. Terms: tikkunolam.today/terms · Privacy: tikkunolam.today/privacy

Custom deliverables built for you under your SOW are assigned to your business — use and modify them freely within your own operations. Pre-built platform components remain licensed, not sold. Full terms: tikkunolam.today/terms · Privacy: tikkunolam.today/privacy

2. Quickstart for this category

Getting started with business automation

1. **Pick the 80/20 workflow:** the task done most often with the clearest rules. Summaries, follow-ups, invoicing, and scheduling are the classic wins — measurable, repetitive, and rule-heavy.
2. **Define inputs and outputs in writing** before touching software: what data comes in, what must come out, what "done" looks like. This single document prevents 80% of automation failures.
3. **Automate the loop in pieces:** ingest → process → output → verify. Keep a human checkpoint on anything customer-facing until its accuracy is proven.
4. **Timebox and measure:** record minutes spent before automation; compare after. If it is not saving hours per week in three weeks, adjust scope instead of abandoning.
5. **Keep the paper trail:** every run logged, every template versioned. When output quality drifts, the log will tell you what changed.

How fulfillment works: this delivery pack is your instant download. Your Gumroad receipt is your proof of license for this product's tier. If anything you expected is missing, message the seller through the chat button on your Gumroad receipt and include the receipt ID.

---

3. License

License: SoulTech Commercial v1.0 — licensed, not sold. Single-seat commercial use; no redistribution, no resale, no reverse engineering; source stays closed. You own your data; we license you the tool. Full terms: tikkunolam.today/license · tikkunolam.today/terms · tikkunolam.today/privacy

Free tiers: the $0+ pricing keeps access open to everyone — consider supporting the work with a paid tier if this product saves you hours.
