1. What you purchased

This is a service engagement, not a software license. Scope per agreed SOW; deliverables are licensed, not sold. Your data stays your property. Third-party platform compliance (e.g., WhatsApp Business API, Discord ToS) is the client's responsibility. Cancel before work begins for a full refund. 2. Quickstart for this category

Getting started with self-hosted / local AI infrastructure

1. **Right-size the workloads:** list what must run locally (privacy) vs what can be cloud (elasticity). Local-first does not mean local-only.
2. **Hardware reality check:** VRAM decides model size. An 8GB GPU comfortably serves 7-8B class models; larger models trade speed for size or quantization. Match ambitions to silicon.
3. **Deploy the stack in layers:** runtime (Ollama), orchestration (agents/automation), state (local knowledge store), and access (loopback-only by default; tunnels only when you intend exposure).
4. **Automate the boring parts:** service definitions with auto-restart, health probes, and log rotation. A stack you cannot reboot hands-free is a stack that will fail at 3 AM.
5. **Practice recovery:** test a full reboot with everything coming back up. Twice a year minimum.

How fulfillment works: this delivery pack is your instant download; your Gumroad receipt is proof of license for this tier. Consultation-tier purchases are scheduled after intake — reply to the seller through the chat button on your Gumroad receipt and include the receipt ID.

3. License

License: SoulTech Commercial v1.0 — licensed, not sold. Single-seat commercial use; no redistribution, no resale, no reverse engineering; source stays closed. You own your data; we license you the tool. Full terms: tikkunolam.today/license · tikkunolam.today/terms · tikkunolam.today/privacy

Free tiers: the $0+ pricing keeps access open to everyone — consider supporting the work with a paid tier if this product saves you hours.
