

AI Invoice Generator — Quickstart Guide

Welcome to SoulTech's AI Invoice Generator

You now have access to an AI-powered billing system that turns leads into paid invoices without manual entry.

What You Get

1. **Automated Invoice Generation** — AI extracts data from leads and creates professional invoices
 2. **Multi-Currency Support** — USD, EUR, BTC, and any currency you need
 3. **Payment Tracking Dashboard** — Know who paid, who didn't, who's overdue
 4. **Auto-Reconciliation** — Payments matched to invoices automatically
 5. **Self-Hosted or Cloud** — Run on your infrastructure or ours
-

Quick Start (3 Steps)

Step 1: Access Your Instance

Your invoice generator is deployed at your assigned endpoint. Check your welcome email for the URL and API key.

Step 2: Connect Your Lead Source

```
POST /api/connect
Authorization: Bearer YOUR_API_KEY
{
  "source": "csv|api|webhook",
  "config": { ... }
}
```

Step 3: Generate Your First Invoice

```
POST /api/invoice/generate
Authorization: Bearer YOUR_API_KEY
{
  "lead_id": "lead-001",
  "template": "standard",
  "currency": "USD"
}
```

API Reference

Endpoint	Method	Description
/api/invoice/generate	POST	Generate invoice from lead data
/api/invoice/list	GET	List all invoices
/api/invoice/:id/status	GET	Check invoice status
/api/payment/track	POST	Track a payment
/api/reconcile	POST	Run auto-reconciliation
/api/connect	POST	Connect lead data source
