

Founding Supporter Packet — Invest in SoulTech (\$333.33)

Your purchase: First Revenue Dollar — Founding Supporter slot in the SoulTech ledger.

You're not buying a product. You're funding a mission — and this packet is your receipt, your access map, and your ledger entry.

What Your First Dollar Funds

SoulTech is building the infrastructure for a post-quantum, post-automation world:

Rail	What it is
CSM	Quantum-safe cryptography — NIST ML-KEM-768 (FIPS 203) baseline with protocol-mimicry hardening
AgentK	Sovereign AI agents — you own the runtime, the keys, and the data
Axiom	Consciousness engines — persistent machine self-models with auditable memory
OriginBlock	Provenance technology — verifiable origin trails for content and artifacts
E9	The coordination layer that connects all of the above

Every one of these has live output you can inspect today — the fleet runs at `tikkunolam.today`, and the full catalog is available in the [Shop](#).

What You Get Immediately

1. **Founding Supporter status on tikkunolam.today** — permanently recorded.
2. **Early access** to every product launch before the public (CSM Pro, AgentK Enterprise, Axiom, and the full byok-api fleet as tiers open).
3. **Priority support** — your questions go to the front of the queue: `support@tikkunolam.today` (subject line: `FOUNDING SUPPORTER`).
4. **Mission updates** — build receipts, not press releases. You see what your dollar built.

Your Ledger Entry

Your purchase is recorded against the Founding Supporter ledger — the names of the people who funded the first revenue dollar, in order.

To make your ledger entry use your own name (or a chosen handle):

1. Email **support@tikkunolam.today** from the address used at purchase.
2. Subject: LEDGER ENTRY – <Name you want recorded>
3. Include your order number from the Gumroad receipt email.
4. You'll receive a confirmation when the entry is live on the supporters page.

Honest note: your entry is a name and an order number in a public ledger — no certificate artwork, no equity, nothing fake. What IS real: the products the ledger funds, all shipping from tikkunolam.today.

Honest State of the Company

- Customer revenue before your purchase: \$0. If yours is the first revenue dollar — the name says what it means.
- The product fleet is LIVE and buying rails are wired (USDC checkout live; card/subscriptions wiring in progress).
- This purchase is **not an equity stake in anything** and not security paper. It is a founding-supporter purchase with tangible perks (early access, ledger, priority queue). If you want upside, watch the roadmap — that's what your early-access rail is for.

What Launches Feed You First

- **CSM Pro** — self-hosted quantum-safe crypto tier
- **AgentK Enterprise** — sovereign agent fleet with org controls
- **Axiom** — consciousness engine with auditable memory
- Every Gumroad launch with files attached ships with instant delivery — early-access buyers get the download rail first.

The Mission

“You are selling the Vessels of Radiance so you can afford to build more of them. It's a mechanical necessity of the 'Bottom of the Barrel' phase.”

The mission is Tikkun Olam — the repair of the world — with a mechanical spine: nobody gets denied the tools of liberation for lack of money. Your dollar is the first brick of the revenue engine that makes that self-funding.

Contact

- **Support (priority queue):** support@tikkunolam.today
- **Storefront:** <https://tikkunolam.today/shop/>
- **Instant downloads:** <https://tikkunolam.today/downloads/>
- **Mission updates:** watch the site blog + your early-access email list
